

Vikas Tomar

Software Developer & Systems Engineer · AI/ML Engineer

Remote Worldwide [Portfolio](#)

01. Summary

Software developer and AI/ML engineer with 40+ projects delivered across 15+ industries. I build native desktop applications, Android clients, backend systems, AI agents, LLM infrastructure, and automation pipelines — wherever off-the-shelf tools fall short. Everything ships with documentation. Remote, worldwide.

02. Education

- **MCA — Machine Learning & Artificial Intelligence**

Amity University Uttar Pradesh, Noida · 2024 – Present

Currently pursuing. Specialization in Machine Learning & AI. Core studies: Deep Learning & Neural Networks, Machine Learning for NLP, Cloud Infrastructure & Services, Advanced DBMS, Core Java, UNIX/Linux Programming.

DBMS

- **BCA — Bachelor of Computer Applications**

Amity University Uttar Pradesh, Noida · 2021 – 2024

Graduated First Division with 8.49 CGPA. **Elective specialization in Data Science & AI** — Data Warehousing & Mining, Data Science, AI, Blockchain, IoT, E-Commerce. Coursework in programming (Python, Java, C, Data Structures), systems (Cloud Computing, UNIX/Shell, Cyber Security), and data (AI, Data Science, DBMS).

03. Experience

● Independent Developer & Consultant

2020 – Present

Delivered 40+ projects for clients across 15+ industries — web scraping, backend APIs, Android and desktop applications, workflow automation, data analysis, and content production.

PixPolorer — Native desktop media workstation built with Qt 6 + QML, C++ host, and 12 Rust crates via custom C FFI. SQLite catalog with BLAKE3 hashing. Encrypted vault using Argon2id + XChaCha20-Poly1305. Fully offline.

Hermes Android — Production Android client for AI agent dashboards. Kotlin + Jetpack Compose, 6-module MVVM with Dagger Hilt, dual WebSocket, biometric/Keystore security, Material 3.

PwnLink — Android IoT companion for Raspberry Pi field devices. Auto-discovery over Bluetooth PAN, custom JSON protocol, GPS streaming, foreground service persistence.

Hidden Leaves — Complete travel booking SaaS. Next.js 16, React 19, TypeScript, Prisma 6, NextAuth v5 with RBAC, review moderation. Caddy + PM2 deployment. Live public demo: hiddenleaves.scrocle.cloud

Agent Infrastructure — Production multi-agent pipeline. Hermes agent with 15+ skills, 3 MCP servers, LiteLLM proxy with custom vertex routing, cron automation, Discord/Telegram bridging.

100% on-time delivery. Consistent five-star feedback across all platforms.

Qt 6

Cryptography

● Software Engineer

2018 – 2020

Developed internal tools and data processing pipelines. Built web scraping infrastructure handling thousands of records daily. Reduced manual data entry by 80% across three departments through custom automation and workflow integration.

Frameworks

React

Next.js 16

Flask

05. Additional Projects

E-commerce Data Pipeline

Multi-source scraper pulling 2,000+ daily product records across 3 competitor

Business Automation Suite

15 n8n workflows connecting CRM, email, and accounting for a 15-person agency.

platforms. Rate-limited, paginated, cron-scheduled with failure handling.

Python

BeautifulSoup

Selenium

CSV

85% reduction in manual data entry. Audit trails built in.

n8n

REST APIs

Webhooks

OAuth

Sales Analysis Dashboard

Interactive Power BI dashboard from 7 months of raw sales data. Identified revenue drivers, regional gaps, and retention economics.

Power BI

SQL

Excel

Technical SEO Audit Tool

Focused crawler checking 11 critical SEO factors. Outputs prioritized JSON fix report with effort estimates. No subscription needed.

Python

BeautifulSoup

JSON

Content Production Pipeline

Keyword research to draft to edit to delivery for multiple clients. 80+ pieces across 5 brand voices. SEO-optimized and on schedule.

06. Services & Rates

Desktop Dev (Qt/Rust)

\$60–120/hr

Android Development

\$50–120/hr

Backend & API Dev	\$50-120/hr	Full-Stack SaaS	\$50-120/hr
AI Agent Orchestration	\$50-150/hr	MCP & LLM Infra	\$50-150/hr
IoT & Embedded	\$50-80/hr		

ALSO AVAILABLE FOR

Web Scraping & Data	\$50-875	Workflow Automation	\$40-100/hr
Chatbots & Bots	\$30-100/hr	AI & LLM Integration	\$35-80/hr
DevOps & Infrastructure	\$50-100/hr	Data Analysis & BI	\$25-50/hr
SEO Audits	\$50-200	AEO — Answer Engine Opt	\$80-250
GEO — Generative Engine Opt	\$150-400	Complete Search Bundle	\$250-600
QA Testing	\$20-40/hr	Content Writing	\$15-50/hr
